ski-doo

**Hello
2016!**

Welcome to the 2016 Ski-Doo Riding Gear, Accessories and Genuine Parts Catalog

As you browse through the more than 180 pages, we hope that you will find the right product that will enhance your riding experience with your Ski-Doo snowmobile. Because we believe that the clothing you wear when you ride and the accessories you add to your snowmobile are critical to your snowmobiling experience, we are constantly pushing ourselves to create innovative and integrated products to satisfy your needs. You will see several new items in 2016 such as the tMotion Adjustable Limiter Strap, Helium Enduro Jacket or the women's version of the TEC + Boot.

We have also been pushing our clothing and accessories catalog the past few years, and the one you are holding is no exception. We want it to be more than page after page of small photos, part numbers and prices. We want it to become a reference guide to help you understand the items we have developed with your needs in mind. To do so, we have showcased detailed features, benefits and innovations for most

items to make your reading experience a great one! Here are also some of the new initiatives we have added to help you do just that:

RIDING GEAR PERFORMANCE RATINGS

It can get confusing trying to sort out the different insulations, waterproof/breathable technologies, etc. With these unique and simple ratings, you will be able to easily understand which trail riding jacket, say, is the warmest or the most waterproof. They'll also help you choose the base layers and mid layers to create a system that will keep you warm for your riding style.

COMPARISON CHARTS

Here, you can see an entire category's items on just one page. Get a quick glimpse at the style, materials, technologies, key features/benefits, BRP Performance Ratings and prices, all at a glance. Get a quick feel for the items, then turn to their respective pages to learn more and see all the options.

VIDEO LINKS

For some of our more technical and popular items, we have developed in-depth videos giving you a tour and explaining their key benefits. If you're browsing on a computer or tablet, just click these links to watch. You can also view them all on ski-doo.com/videos and our YouTube channel.

TECH ZONES

Advanced technologies and designs make our riding gear and accessories stand above the rest. On these pages, you'll see what technologies we use and how they work.

DEVELOPMENT STORIES

This year, we have a series of articles taking you inside our development processes. Where we get ideas, how products come to life, and what we consider before giving an item the "green light" for production.

EXPERT ADVICE

We have articles to help you choose the best helmet type, guide you through our suspension upgrade options, what to factor in when considering track studs, and other helpful tips.

FUN, INSPIRING STUFF

There are profiles of interesting riders from around the world, little snippets of interesting information (Innovations, Did You Knows), previews of consumer sleds in the works and more.

We hope you enjoy this catalog. We believe you deserve the ultimate riding experience.

Think Snow!

For advertising purposes, some scenes depicted in this brochure include professional riders and racers executing maneuvers or performances under ideal and/or controlled conditions. Do not attempt any of these or any other risky maneuvers if they're beyond your level of riding ability, as well as your understanding and respect for the performance of your snowmobile. Always ride responsibly and safely. Always observe applicable local laws and regulations. Always wear the appropriate protective clothing, including a helmet. And remember, if you're going to drink, please don't ride. Because of its ongoing commitment to product quality and innovation, Bombardier Recreational Products Inc. (BRP) reserves the right, at any time, to discontinue or change specifications, prices, designs, features, models or equipment without incurring any obligation. Some models depicted herein may include optional equipment. Prices are based on Manufacturer Suggested Retail Prices. Dealer may sell for a different price. BRP is a proud member of SSCC (Snowmobiling Safety Certification Committee), Machine Safety Standard, Operator Safety Training, Safe Trails, ISMA (International Snowmobile Manufacturers Association), National Snowmobile Foundation and Tread Lightly! Inc. By being a member of these important snowmobiling associations, we recognize and support their efforts in sharing the responsibility in promoting the growth of our sport. GET THE RIGHT GEAR

Wearing gear for the type of riding you do will maximize your snowmobiling experience. Look for the icon that best matches your riding style:

MOUNTAIN

CROSSOVER

TRAIL PERFORMANCE

TOURING

RECREATIONAL / UTILITY

LEARN MORE AT A GLANCE

Look for these icons throughout the catalog to learn a bit more about key products

NEW
New item for 2016.

DID YOU KNOW
An interesting tidbit about an item beyond the product description.

INNOVATION
An item BRP pioneered that takes your ride to the next level.

CREATE YOUR CLIMATE WITH THE BRP PERFORMANCE RATING

Warmth

This rating considers all aspects of the garment, including insulation, waterproofness, windproofness, breathability and fabric construction. Use it as your main criteria.

Waterproof/ Windproof

This rating reflects the technology used, sealed seams, zipper types and more.

Breathability

This rating indicates how effectively perspiration is moved away from your body and out of the garment.

We designed this Performance Rating System so you can easily choose and compare riding gear to find the ideal combination of performance and value for how YOU ride. Each riding gear garment has 3 performance ratings. **Look for these in the item descriptions throughout the catalog.**

On a 1 to 5 scale, 5 is the highest.

How to create your climate

Mix outer layers (jackets and pants), mid layers and base layers to create a level of warmth that matches your riding style and natural body temperature. First, consider your waterproof/windproof and breathability needs. **Then just add up the WARMTH rating of each garment in each layer to get your system warmth total — the higher the number, the warmer the system.**

When building your system, be sure to consider your:

- **RIDING STYLE** (active vs. relaxed)
- **RIDING ENVIRONMENT** (mild vs. extreme cold)
- **BODY TEMPERATURE** (do you run hot or chill easily?)

Examples of riding styles	Base Layer	Mid Layer	Outer Layer	Total Warmth Rating
VERY ACTIVE MOUNTAIN RIDER	 Active Base Layer ●	+  X-Team Microfleece ●●	+  Helium 50 Jacket ●●●	= 6
TOURING RIDER IN COLDER CONDITIONS	 Thermal Base Layer ●●	+  Thermal Pants ●●	+  Voyager Highpants ●●●●	= 8

ADD FLEXIBILITY WITH LAYERING

No matter which outer layer you choose, the mid layer is where you can really adapt your climate to the conditions — even as they change throughout the day.

For an extreme cold snap, consider adding a Packable Down Jacket. You could even also add the Heated Vest Liner.

When it's mild and you're using a lot of energy, you might go with no mid layer at all, just a good base layer.

- Powder skirt
- High front and back bib panels
- Lightweight fleece and mesh inner liner

TECH ZONE MOUNTAIN

HELIUM 30*

LIGHTWEIGHT AND TOUGH, YET HEAVY ON TECHNOLOGY.

Neoprene inner collar

Microfleece inner ply

Sympatex 2-Ply Laminated Polyester Cordura

Highly windproof, waterproof and breathable membrane

Water-resistant zipper at front opening

Reflective details

All seams sealed

Powder skirt

Adjustment at waist and hem

Velcro wrist adjustment

TECHNOLOGY GUIDE

Sympatex membrane

Ski-Doo Riding Gear with Sympatex Lifetime Warranty

RECCO⁺ Avalanche Rescue System

Laminated Polyester Cordura

A high-performance insulation with the full spectrum of benefits to brave the elements

Provides maximum warmth no matter how tough the ride or how cold the environment. All seams and logos sealed

Fit, Form, Function.
Our Helium line features
the most advanced patterns
for the best performance.

*Shown with Packable Down Jacket. Sold separately.

100% waterproof –
non porous membrane
will never quit

Did You Know?

Gear with Sympatex doesn't have pores like other membranes and can be washed over and over without clogging or loss of performance.

Stretches to 300% of its size

Extremely
durable
and tough

Breathability will
increase with heat
and humidity

100% windproof – non porous,
meaning that wind has no way
of entering

All Helium gear uses the advanced Sympatex waterproof/windproof/ultrabreathable membrane that actually gets more breathable the harder you ride.

100% WATERPROOF

ULTRABREATHABLE

100% WINDPROOF

COMPARISON OF WATER VAPOUR TRANSPORT

A membrane is waterproof
if it can resist a pressure of

1,300 mm

Sympatex membrane is extremely
waterproof since it can resist over

45,000 mm

We believe so strongly in our Sympatex gear that we back it with a lifetime warranty.
Go to www.store.ski-doo.com/warranty for details.

WARRANTY COVERAGE PERIOD

Bombardier Recreational Products Inc. (BRP) warrants that all its 2016 Sympatex Riding Gear sold as New and Unused by an authorized North American BRP dealer will be free from any defect in material and / or workmanship for the lifetime of the product*.

* The lifetime of a product does not mean your lifetime. The intensity under which the product is used determines this factor. Rips, tears, punctures, holes and burns will void the product lifetime warranty even if the warranty issue is not related to these damages.

HELIUM 30 JACKET

2 5 6

A radically lightweight and flexible jacket for the most active riders. Keeps you warm and dry thanks to Sympatex technology.

Shell: Sympatex 2-Ply Laminated Polyester

440576 • XS, S, M, L, XL, 2XL, 3XL
White (01), Orange (12),
Hi-Vis Yellow (26), Black (90)

HELIUM PULLOVER JACKET

2 5 6

The most lightweight shell in our lineup, feels like wearing no shell at all. Innovative materials deliver breathability, performance and durability for mountain riding.

Shell: Sympatex 2-Ply Laminated Polyester

440666 • XS, S, M, L, XL, 2XL, 3XL
Orange (12), Hi-Vis Yellow (26),
Black (90)

The Sympatex membrane stretches to 300% of its size, so it maintains its properties in high bending areas, like elbows and knees.

N

PACKABLE DOWN JACKET

3 3 4

An ideal mid layer for active riders. Down insulation compresses to take very little room in your pack or storage compartment.

Shell: 90% Nylon, 10% Polyester
Insulation: 50% PrimaLoft Ultrafine Fibers, 50% Water Repellent Down

440714 • S, M, L, XL, 2XL, 3XL
 Black (90)

See the features of the new Packable Down Jacket.

Go to: www.ski-doo.com/videos/gallery

Our Helium Highpants feature curved zippers on outer leg to prevent bunching of the material.

**HELIUM 30 HIGHPANTS**

2 5 5

Riding pants for active riders with Sympatex technology to protect you from wet and cold conditions. Our lightest, most flexible highpants.

Shell: Sympatex 2-Ply Laminated Polyester

441548 • XS, S, M, L, XL, 2XL, 3XL
 Black (90)

HELIUM 30 JACKET

2 5 5

Advanced technology and performance in a lightweight shell designed for women riders.

Shell: Sympatex 2-Ply Laminated Polyester

440695 • XS, S, M, L, XL, 2XL, 3XL
Charcoal Grey (07)

PACKABLE DOWN JACKET

3 3 4

An ideal mid layer for active riders, styled with a women's cut. Down insulation compresses to take very little room in your pack or storage compartment.

Shell: 90% Nylon, 10% Polyester

Insulation: 50% PrimaLoft Ultrafine Fibers,
50% Water Repellent Down

SKI-DOO AMBASSADOR PROFILE:

ASHLEY CHAFFIN

MCode Jacket and Pants
XP-R2 Helmet
Backcountry Gloves

2015 Freeride 146
2015 Summit X 163 w/T3 package

PASSION

The outdoors. From taking my dogs on a hike to riding sleds, having fun and going on new adventures is something that has always driven me. Snowmobiling's really turned into a year-round passion. I'm lucky enough to live in Alaska where we can ride for 7 months of the year, and then I spend most of the off-season training for the next one. I'm also passionate about sharing the sport, always trying to share what I've learned with other riders and get new people involved.

RIDING

My favorite area is my hometown of Valdez after one of its signature 3-foot snowfalls. It's even better when you mix in sun with blue skies and deep untracked powder. The final piece is taking off from the parking lot with a group of good friends and not crossing another track all day long.

RACING

I grew up racing both snocross and cross-country on the weekends with my dad. But once I got a little older and started riding the backcountry with friends, I was hooked on that.

GEAR

The versatility of the 3-in-1 jacket and the lightly insulated pants make the MCode my "go-to" gear. I usually wear it as a shell when I'm riding during the day and then put the liner back in for those long cold rides back to the truck. Plus, I'm loving the latest colors!

"NORMAL" JOB

I own two coffee shops in Valdez. Sacred Grounds is a drive-through in the middle of town and Klondike Coffee is a walk-up inside a grocery store. Being a business owner is challenging, but it gives me a flexible schedule during the winter to get out and ride as much as I can.

MOST FUN ON A SLED EVER

Ha! That changes about 100 times every year. After every great day of riding, I'm usually thinking to myself that was the "most fun on a sled ever!" But then as soon as it snows, it seems like I'm right back out there having the "most fun on a sled" all over again!

"The versatility of the 3-in-1 jacket and the lightly insulated pants make the MCode my "go-to" gear."

SKI-DOO AMBASSADOR PROFILE:

PATRIK NORDSTRÖM

LULEÅ, SWEDEN

"I ride wearing a Modular 3 Helmet, which suits me perfectly by being completely fog free in our cold climate."

Modular 3 Helmet
Revy One-Piece Suit

2015 Summit X 163 w/T3 package
2012 Freeride 137
2007 Summit 600 SDI

"Powder surfing is probably the most fun you can have while still wearing clothes!"

PREVIOUS PASSION

Cars and drag racing have always been great interests of mine. I drove and competed in drag racing for 15 years with different cars. I have also competed in off-road racing with my Jeep.

CURRENT PASSION

Sled riding. The unbeatable feeling of freedom combined with the physical challenge is what drives me. Powder surfing is probably the most fun you can have while still wearing clothes!

RIDING

Me and my family winter camp in Käbdalis in the north of Sweden, where there are wonderful backcountry freeriding possibilities. I also enjoy longer trips with my friends in the Swedish mountains. Vuoggatjålme, Kittelfjäll, Abisko and Riksgränsen are a few examples of where you'll find really great mountain riding opportunities for sleds.

GEAR

I ride wearing a Modular 3 Helmet, which suits me perfectly by being completely fog free in our cold climate. The Revy One-Piece Suit gives me the feeling of freedom and mobility, and I avoid getting snow between the jacket and pants, which is great!

"NORMAL" JOB

I am a servicing technician specialized in repairing wheel loaders, dump trucks and excavators on site.

MOST FUN ON A SLED EVER

What I enjoy the most is when me and some friends ride once a year to a remote village called Nausta. There, we are treated with endless areas covered with untouched powder. Nothing beats this trip!

DAVE NORONA

Helium 50 Jacket and Highpants
Revy One-Piece Suit

2015 Summit X 174 w/T3 package
2015 Summit X 163 w/T3 package

"I never thought I would be into a one-piece suit, but after trying the Revy, I'm hooked. It's light, warm, easy to move around in and has a ton of pockets for cameras and other important stuff. It just looks and feels awesome!"

PREVIOUS PASSION

Racing. Everything from bikes and skis to surf skis and running.

CURRENT PASSION

Sledding, sled skiing, trial bike riding, biking... anything that takes me way back into the backcountry. I love being in the outdoors, exploring new areas and just having a good time in the fresh snow.

RIDING

To steal a line from Bret Rasmussen: "My favorite place to ride is where it dumped yesterday." And I'd add "with anyone who loves to have FUN!"

RACING

I've done more than 400 adventure racing events worldwide over the past 18 years. Now I prefer my adventures at my own pace.

GEAR

I never thought I would be into a one-piece suit, but after trying the Revy, I'm hooked. It's light, warm, easy to move around in and has a ton of pockets for cameras and other important stuff. It just looks and feels awesome! I also love the XP-R2 Carbon Helmet. It's super light, which makes a big difference after a long, satisfying day of riding deep pow.

"NORMAL" JOB

I currently do activities and appearances for my sponsors, host bike races, do motivational speaking and team building – anything but a traditional job, it seems. I play for a living, something I'm grateful for.

MOST FUN ON A SLED EVER

Most fun on a sled ever: Every time I go out into the backcountry, I have a blast! And because the Ski-Doo sleds get easier and more fun every year, I'm having more fun. I mean, with my Summit X 174 with T3, you pull a line you never thought you would make and look back... "WHAAAAT?!?!?!?" Now that's FUN!

PRODUCT DEVELOPMENT

INNOVATION TAKES MANY FORMS

FIT

So much of your comfort depends on the fit of your garment. It's more than just "if it feels comfortable" (though that's key). You also need to be able to move how you want.

PROPER FIT IS CRITICAL TO GETTING MAXIMUM WARMTH AND BREATHABILITY.

So we have been refining the fit of our gear with a "Fit, Form and Function" approach. Take the Helium 50 Highpants. We heard from riders, including Rob Alford and Carl Kuster, that they would bunch in certain areas and be hard to maneuver in. Our designers then spent time riding, observing and studying, and came up with a whole new ergonomic design featuring a unique curved side zipper. It fits perfectly on the leg, there's little bunching and the zipper is less exposed to snow and wind.

Fit, Form and Function Helium 50 Highpants

DESIGN

Our passion dictates that there's almost always room to improve a design. Because there are a lot of choices out there, we really pushed ourselves to make the new TEC+ Boot different.

We did that by insisting on snowmobile-specific features that would deliver a great riding experience — while also being versatile enough to wear every day.

Up front, you'll notice that the laces start further up the foot than a standard boot. That eliminates pressure points when you hook your foot into your sled's stirrups. It's also why there are no metal lace eyelets (this also prevents you from scratching your sled). The honeycomb pattern around the ankle area looks cool — and functionally speaking, the harder material acts like an exoskeleton, preventing scuffs and scratches while staying light and flexible.

Cool and functional honeycomb pattern

MATERIALS

As snowmobiles have become more capable, riders have become more active (especially in the mountains), leading to our sport surpassing the effectiveness of the well-established waterproof/breathable technologies. To ensure you stay warm and dry, our team searched for alternatives that were totally waterproof and windproof, but more breathable.

That led us to Europe and the ultra lightweight/high performance **Sympatex membrane technology** that had gained a great reputation in their ski and outdoor industry. It debuted in our Helium mountain riding gear and because of its performance, we have spread the technology to trail riding and crossover gear. But we are not wed to a single technology — we use what's best to maximize each product's performance.

At BRP, innovation is core to our DNA. But what does that really mean, especially in the context of Ski-Doo Riding Gear?

Here are four ways where our quest for new solutions has made the snowmobiling experience better.

CONCEPTS

Of course, it's not just details we are looking at — we take a big-picture view, too. We started the Modular Helmet revolution by rethinking the visor-fogging problem. The resulting snowmobile-specific Modular and BV2S Helmets and their wide, clear openings are some of the best-selling in the industry.

And for 2016, we are creating a new segment in outerwear with the Enduro Jacket and Highpants.

Just like crossover sleds, they combine the best features of mountain gear (Sympatex breathability, added coverage, minimal styling) and trail performance gear (light, breathable insulation).

When you look at the riding gear in the snowmobile industry, you can bet that you'll see innovation in all four of these areas and that Ski-Doo will be out front — ensuring you have a great snowmobiling experience.

For instance, we recently adopted OutDry waterproof/breathable technology for the Backcountry and Highmark Gloves. It's specific to gloves and footwear and delivers feel like nothing else.

N Highmark short-cuff Gloves

N Helium 30 Highpants

CROSSOVER

Versatility for however and wherever you ride.

Crossover riding is active, but in colder climates. So just like our crossover sleds, we took the best features and technology from our mountain and trail riding gear to create a whole new category.

HELIUM ENDURO JACKET

3 5 5

Ultra high performance jacket with mid-weight insulation to keep you warm and dry, whether you're carving up trails or exploring the woods.

- Sympatex waterproof/windproof/breathable technology.
- All seams sealed.
- Water-resistant zippers at front, pockets and vents.
- Microfleece inner collar.
- Easy-to-reach bicep vents.
- Powder skirt.
- Hem, collar and wrist adjustments.
- Inner microfleece cuffs.
- Silicone grips at shoulder to stabilize a backpack.
- Wide reflective features for better visibility.
- Reinforced elbows and back hem for durability.

Shell: Sympatex 2-Ply Laminated Polyester, Cordura
Insulation: PrimaLoft Black

440713 • XS, S, M, L, XL, 2XL, 3XL
Charcoal Grey (07)

HELIUM ENDURO HIGHPANTS

3 5 5

For the rider who wants to do it all, on and off trail. Mid-weight insulation, Sympatex technology and lots of features to keep you comfortable.

- Full-length waterproof side zippers.
- Front 2-way zipper.
- Shaped, padded and reinforced knees.
- Storm gaiters prevent snow entry at ankle.
- Adjustable suspenders.
- Waterproof hip pockets.
- Chest pocket.
- Cargo pockets.

PRODUCT DEVELOPMENT

LEADING WHILE LISTENING

Sure, our clothing and accessory developers are heavily involved in, and passionate about, snowmobiling. But we always seek new ideas and unique solutions to every condition. So we do a lot of listening. To consumers like you, dealers, and other experts.

We get great ideas for new items to develop. And real world feedback on how to improve an item – both before it's released and after it's in your hands.

Listening to so many people in so many places with so many different perspectives enables us to continue delivering products that enhance your snowmobiling experience.

Here are some of the people and places with an ear to the ground at all times:

DEALERS

No one is closer to riders than our dealers, so we are constantly soliciting their advice and counsel. We often bring a handful of dealers together to show future items and get their reactions.

FOCUS GROUPS

Sometimes we really jump inside snowmobilers' minds on a new concept or product before bringing it to market, so we get a bunch of them together and ask for reactions.

OWNERS' SURVEY

When this comes in the mail, be sure to complete and return it! Your answers here are shared between the sled and riding gear marketing departments and can influence future trends, products and priorities.

ONLINE FORUMS/SOCIAL MEDIA

Yes, we are out there reading what you have to say on the top forums and our Facebook pages. The past few seasons, we have received helpful feedback on a popular online forum on key items from the Gear Tester program.

ENGINEERING STAFF

Heading out and riding — often for days or weeks at a time — is their job, so they really understand what's great about a product or what can be improved.

EXPERT RIDERS/RIDING CAMPS

We have a collection of expert riders we trust and ask for feedback and suggestions on current and future gear and accessories. Each offers a different perspective. For instance, Carl Kuster and his team outfit dozens of riders at his CKMP camp rides each winter. Ashley Chaffin gives us a young, female point of view. Dave Norona has relationships with a wide variety of outdoor gear companies, from skiing to mountain biking to hiking.

RACE TEAMS

Racers are great testers for us because pushing themselves, their sleds and their gear to the absolute limits is what they're all about. And every discipline has something to offer. Snocross racers are active, needing breathability and waterproof protection. Cross-country racers, like in the Iron Dog race, face bone-chilling colds on high speed straightaways.

SNOWMOBILE SHOWS

We have several people who attend shows to talk to you about accessories and clothing. They take your suggestions and comments, and share them with our development teams. This process has been magnified by the Knowledge Centre truck that we had at several shows. And at the 2013 Hay Days event, we had our ergonomics experts measuring hundreds of riders' heads to fine tune future helmet fits.

RECREATIONAL / UTILITY

Gear that works or plays as hard as you do.

You want – no, you demand – great value from your gear. Look no further, because our Recreational and Utility collections combine our unmatched experience in designing snowmobile-specific gear with a commitment to great value.

EXPEDITION SERIES

Rugged style with great value.

Reinforced elbows and forearm

Fleece-lined seat

Microfleece inner neck and sleeve cuff

Easy-to-reach bicep vents

Parka length for warmth with side slits

9 multi-purpose pockets

Reinforcements at seat and inside knees

FEATURES NOT SHOWN

- Teflon coating for soil proof
- Adjustable collar and wrist

EXPEDITION JACKET

4 3 3

A full-featured jacket that's ready to work - or play - as hard as you do. Parka length for warmth with 9 pockets and reflective webbing.

- Parka length for warmth.
- Side slits.
- Teflon coating.
- Two insulated front zipper flaps.
- Powder skirt.
- Reinforced elbows and forearm.
- Easy-to-reach bicep vents.
- Adjustable collar and wrist.
- Microfleece inner neck and sleeve cuff.
- Detachable hood.
- Critical seams sealed.

TECHNICAL WEAR

What's under the shell counts

To keep warm, you've got to keep dry. Our technical base and mid layers wick perspiration away from your skin where it can evaporate quickly for all-day warmth.

TECH ZONE

TECHNICAL WEAR

HOW IT WORKS

Each layer has a function. You get the best performance and versatility when you dress in a system with base layer, mid layer and outer layer.

OUTER LAYER

Keeps wind and water out.
Adds insulation for warmth.

MID LAYER

Dials in your warmth level.
Add or remove during the day as conditions change.

BASE LAYER

Close to the body to wick perspiration and prevent chills.
Adds warmth. Avoid cotton — it gets wet and stays wet.

Did You Know?

Cotton doesn't breathe, trapping moisture against your skin and causing you to feel cold and wet. High performance base layers allow moisture through, keeping you dry and warm.

CREATE YOUR OWN CLIMATE

The combination of base layer, mid layer and outer layer works together to keep you warm and comfortable. Select and combine each to create your own climate for how you ride. For instance:

ACTIVE MOUNTAIN RIDER

Needs highly breathable gear to let perspiration escape.

ACTIVE TRAIL RIDER

Needs breathability with a bit more insulation, especially in colder climates.

LONG DISTANCE CRUISER

Needs more thermal gear with added insulation.

We've made it easy to choose just the right gear. Look for these ratings with each layer. You can even add the warmth ratings of different layers together for an overall system rating. **Learn more about our climate rating system on pages 4-5**

FEATURES

- Weighs only: +/- 1200 g for size Large.
- Tool-less multi-adjustable front peak with anti-reflecting underside.
- Flexible face trim design with a large nose protector area.
- F.A.S. (Full Air System) with 10 ventilation points and double rear extractor.
- Integrated rear fin.
- Integrated goggle anti-slip design.
- Multi density EPS foam inner shell.
- Removable and washable inner liner and cheek pads.
- Liner features sanitized treatment.
- Front top pocket for sweat absorbing pads.
- Morpho System Plus - Ergonomic 3D cheek pads.
- Double D racing buckle.
- Aluminum screws, protective coated parts.
- Helmet bag.
- D.O.T. and ECE 22.05 certified.

BENEFITS

- ▶ Less stress on neck and shoulder muscles.
- ▶ Allows quick visor adjustment and reduces glare.
- ▶ Protects from wind and snow.
- ▶ Allows you to control airflow for cooling.
- ▶ Added stability and aerodynamic performance.
- ▶ Superior protection over single-density foams.
- ▶ Keeps your helmet fresh.
- ▶ Promotes wicking of moisture.
- ▶ Allows for a better fit.
- ▶ Most secure fastening method.
- ▶ Assures lasting appearance.

- Superlight polycarbonate shell.
- EPS inner shell.
- Front and rear vent system to keep you cool.
- Custom stainless steel front vent design.
- Fully-adjustable visor system.
- Removable, washable and replaceable moisture-wicking liner.
- Winter breath deflector.
- Goggle strap grip.
- Lightweight double-D chin strap.
- ±1470 grams in size Large.
- Meets or exceeds SNELL M2015 and D.O.T. certifications.

- ▶ Less stress on neck and shoulder muscles.
- ▶ Impact absorbing protection.
- ▶ Allows you to control airflow for cooling.
- ▶ Added stability and aerodynamic performance.
- ▶ Keeps your helmet fresh.
- ▶ For warmth on cold days.
- ▶ Most secure fastening method.

THE DIFFERENCE IS THE DETAILS

YES, OUR XP-R2 CARBON LIGHT HELMETS ARE AMONG THE INDUSTRY'S LIGHTEST. BUT THERE'S SO MUCH MORE TO THEM - WE WORKED TO MAKE EVERY ELEMENT COMFORTABLE, FUNCTIONAL AND HANDSOME.

CHOOSING THE BEST HELMET

When it's time for a new helmet, choosing one that meets your needs and your riding style is crucial so you get the most from your riding. It shouldn't be about what your friend or everyone else is wearing, or even the style you last wore – helmets have changed and maybe you have, too.

Some people actually need two helmets because the conditions or locations of their rides vary greatly. Take the time to really assess what you need from your helmet and make a decision based on the attributes you decide on.

TODAY'S HELMETS COME IN FOUR STYLES

OPEN FACE

¾ style with no front chin or facial protection

SNOCROSS

Sometimes mistakenly called "open face"

FULL FACE

Fixed jaw section with visor

MODULAR

Ability to lift/open the jaw section as well as the visor

SO WHICH FEATURES ARE MOST IMPORTANT TO YOU?

If you do a lot of trail riding and ride in very cold areas, look first at a Full Face or Modular helmet. Its full coverage, sealed design will keep you warm on those frigid days (made even colder by the higher speeds on trails) while also providing great vision. With the Modular style helmet, especially our Modular 3 and BV2S models, you can easily stop and talk with your riding group or grab a quick drink or snack. It's also more comfortable getting the helmet on and off.

For warmer riding conditions and more active riding, you might opt for a Snocross helmet with goggles. In highly active riding where you will be sweating and breathing hard – like most mountain rides – goggles are the best solution for clear vision, and the more open area helps keep you from overheating. If this is your choice, bring an extra set of goggles so if the first ones fog up, you have a spare set. Store the extra set in the Oil Support Caddy/Goggle Bag p.148 and they'll clear up with the under-hood heat. Rotating two sets means you'll always have clear vision.

WHAT STYLE IS BEST FOR...

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

Height: without shoes, standing with heels and back against a wall.

Head: around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

Arm length: let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Chest: measure under your arm, around the fullest part of your chest.

Waist: immediately below the lowest rib.

Hips: across the fullest part of the seat.

Inseam: without shoes, from crotch to the floor.

WHAT CODE REPRESENTS YOUR SIZE?

1 Find your size.

2 The corresponding code is THE CODE you use to complete the part number on your order.

Example: 440 227 __ 90

Size: M = code "06".

Therefore 440 227 **06** 90

SIZE	CODE	SIZE	CODE	SIZE	CODE
One Size	00	1	20	13	33

2XL	14	7	27	7-8	54
3XL	16	8	28	10-12	49
4XL	18	9	29	14-16	50
5XL	88	10	30	S/M	72
		11	31	M/L	91
		12	32	L/XL	73

THE WORLD IS OUR PLAYGROUND

Nothing is more valuable than your playtime. That is why BRP is dedicated to continually finding new and better ways to help you enjoy your favorite powersports. From snow to water to both on- and off-road fun, our passion for adventure fuels the innovations that result in the ultimate powersports experience for our customers. We value

the land and water we play on and are committed to protecting it. Our desire to thrill is paired with an emphasis on rider responsibility, placing personal safety above all else. So that each outing can be the most enjoyable, memorable and thrilling experience possible. Because your free time should always be your best time.
