FIND THE RIGHT JACKET

WHICH JACKET SUITS YOU BEST?

Hit the road in style, your style. There's a Can-Am jacket that fits you in every way and is loaded with the features you want. Whether you choose mesh jackets for keeping cool, leather jackets for their classic look, or ultradurable nylon for serious road trips, we've got you covered. They're all available in a range

of regular and plus sizes, for men and women, and are designed to work with our exclusive weather-beating rain gear. All you have to do is choose, and we've made that easier than ever. Whatever your destination - and whatever your riding style - you can be sure we've got a jacket that suits you perfectly.

100% WATERPROOF

To keep dry in all conditions.

WATER RESISTANT

To keep dry in light rain conditions or during short rides.

WINDPROOF

To protect from air infiltration.

REMOVABLE INSULATED LINING

To adapt to the current temperature. Wear when cold, remove when warm.

REMOVABLE **PROTECTORS**

Pouches to insert removable protectors.

ADJUSTED FIT Fits closer to the body.

Looser fit for relaxed riding position.

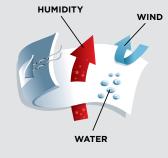

RPM MAX

HIGH PERFORMANCE GEAR WITH RPM TECHNOLOGY

100% of seams and logos are sealed, so through potential

coatings keep wind and air out and still allows perspiration to escape.

HOW TO **MEASURE**

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

HEAD

Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

CHEST/BUST

Measure under your arms, around the fullest part of your chest.

Measure around your natural waistline, keeping one finger between the tape and body.

Across the fullest part of the seat.

INSEAM

Without shoes, from crotch to the floor

ARM LENGTH

Let hands down the side in a slightly bent position. Measure from center back neck bone, along shoulder point and elbow, to bottom of wrist bone.

GLOVES

Measure palm width.

WHAT CODE REPRESENTS YOUR SIZE?

- 1. Find your size.
- 2. The corresponding code is THE CODE you use to complete the part number on your order. Example: 440 227__90 Size: M = Code 06 Therefore 440 227 06 90

ACCESSORIES

LOOK BEYOND THE ORDINARY.

UNIQUE BEGINS WITH U

Create a Can-Am Spyder that's as unique as you are.

Our exclusive 4U Guide is the key to kick starting your customization.

Choose and cruise. As easy as 1-2-3-4.

We created the 4U Guide, your personal guide to customization. It's based on you - your needs, your riding style, your personality and preferences - so the accessories you choose will be the right ones.

These 4 questions will help you better understand your needs and really make this guide work for you in selecting accessories.

1. Is your Can-Am Spyder adjusted to your body?

Run through our U-Fit section and find what handlebar and footpeg positions fit you best.

2. Does your Can-Am Spyder have all the accessories you need?

Would you like to reduce the wind flow to your face? Are you riding solo or 2-up? Do you need more storage space? Check out our U-Function section and make your vehicle better suited for you.

3. Does your Can-Am Spyder truly express your personality?

Are you looking for a sportier attitude? Or a more luxurious look with chrome accessories? Discover our custom accessories in the U-Style section.

4. Do you want to unleash the power and handling of your Can-Am Spyder?

Are you looking for a deeper more guttural sound? A cushier ride? Find what you need in our U-Performance section.

The 4U Guide is the simplest way to create a Can-Am Spyder that's truly a reflection of you. We've thought of everything including compatibility and fit with accessories. The 4U Guide makes choosing accessories simpler, more practical, and easier to understand. Now nothing stops U.

Now you can tailor your Can-Am Spyder to fit you like a dream. Tweak and adjust the fit that lets you truly connect with your ride. It's all about comfort and enjoying every stretch and curve of the road to freedom.

CUSTOM ACCESSORIES

A bobber, originally called a 'bob-job' from the 1930s through 1990s, is a style of custom motorcycle. The typical construction includes stripping excess bodywork from a motorcycle, and shortening the rear fender, which is "bobbed" (as in bob-tail)

OILS & MAINTENANCE 113 112 OILS & MAINTENANCE

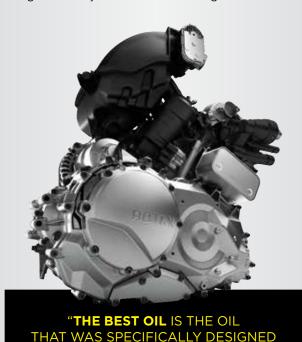

USING THE RIGHT OIL MATTERS

The right oil delivers:

THE BEST PERFORMANCE THE BEST RELIABILITY THE LONGEST LIFE

It's a balancing act to deliver all three attributes and only XPS, with its custom blend formulations and carefully matched additives, is specifically designed to do just that in a Rotax engine.

Mischa Zimmermann Project Leader Engine Development, BRP

FOR THE ENGINE, WITHOUT COMPROMISING THE ENGINE."

DOES ONE OIL FIT ALL?

Our efficient, high-output engines place strong demands on engine oil. At BRP, we treat oil like an actual mechanical part that is developed concurrently with our latest high-performance engine technology.

XPS 4-STROKE OILS

Fact: XPS 4-stroke oils are BRP engineer-certified for unmatched lubrication, the right torque and friction transfer characteristics for Spyder's manual and semi-auto clutches, the right viscosity to best protect our engines from startup to operating temperatures, and they all have extra corrosion protection to better safeguard your engine when stored or when riding in harsh conditions. Also, XPS has been proven to withstand the Rotax 1330 ACE 9,300-mile (15,000 km) extended drain interval.

WHY CHOOSE XPS 4-STROKE ENGINE OILS INSTEAD **OF LOWER-COST ALTERNATIVES?**

BRP engineers and experts like Mischa Zimmerman have proven repeatedly that other brands of oil don't meet the high standards BRP desires for Spyder engines.

- · Each vehicle manufacturer establishes their own lubrication standards and test criteria to validate OEM oil - this means XPS achieves a much higher standard than a typical powersports or motorcycle oil.
- Even oil that is more expensive than XPS will not have the same custom-matched engine and tuned clutch performance for Rotax engines and transmissions. Other oil - even premium aftermarket motorcycle oil - has caused premature clutch wear.
- Our oil is tested on the whole lineup of vehicles and engines we manufacture - not just one or two models. Our specific testing includes real world test miles to ensure XPS meets our performance requirements as opposed to relying only on generalized, minimum specifications that most aftermarket oil brands use.

AREN'T THERE OTHER HIGH QUALITY OILS ON THE MARKET?

Yes. But no other oil is designed as an actual mechanical part during engine development like XPS. Your satisfaction matters.

XPS OILS AND ROTAX ENGINES. CREATED, DEVELOPED, AND CONSTANTLY EVOLVING TOGETHER TO WORK BEST TOGETHER.

It's all about reaching optimum performance and protection, ensuring XPS oils have no equals when used in Rotax engines, and Rotax engines have no equals when they use XPS oils.

QUALITY, INNOVATION, RELIABILITY AND PERFORMANCE GO INTO EVERY BRP VEHICLE AND INTO EVERY DROP OF XPS OIL.

Our performance requirements exceed oil certification standards, so we set our own: Testing, and retesting our oils in every Rotax engine type under a wide range of rigorous operating conditions to make sure they work the best under all conditions.

XPS IS THE ONLY OIL SPECIFICALLY ENGINEERED FOR ROTAX ENGINES.

BRP's Rotax engines are the perfect embodiment of power and technology, and only highly specialized, specially engineered XPS oils can ensure they always operate at their maximum efficiency and potential.

XPS OILS & ROTAX ENGINES. PARTNERS IN PERFORMANCE.

RECOMMENDED PERIODIC MAINTENANCE SCHEDULE

Going to your BRP dealership for regular maintenance servicing can prevent bigger and more expensive repairs in the long run. Just follow the recommended maintenance schedule.

It was designed by experts who understand your Can-Am Spyder and know how to keep it in top form. Take care of your vehicle by maintaining it using strictly BRP and Rotax OEM or 100% Can-Am-approved parts and products. You bought the best vehicle available on the market. It deserves the best maintenance products in the world. Just match your vehicle engine type and mileage with the proper chart column to identify maintenance items to perform. Also, don't forget to do your pre-ride inspection.
