# TECHNOLOGIES

OUR RIDING GEAR AND TECHNICAL WEAR ARE BUILT WITH ADVANCED TECHNOLOGIES THAT PROTECT YOU WITH WARMTH, WATERPROOFNESS, LIGHTWEIGHT AND BREATHABILITY.

## PRIMALOFT®

A high-performance insulation with the full spectrum of benefits to brave the elements. Warmer, drier, softer and more compressible than any other synthetic insulation.

## RPM/RPM MAX

Coatings that provide maximum waterproofness, windproofness and breathability.

**RPM Max:**  
All seams  
& logos sealed

**RPM:**  
Critical seams  
& logos sealed

## eLinQ CONNECTOR SYSTEM

All of our jackets (except shells) have provisions built in for a heated shield wire – riders can leave the wire in the jacket securely fastened and out of the way.

## YKK

We use the world's best – YKK zippers – recognized for quality and reliability.

## CORDURA®

Often added to garment zones that need extra durability, such as arms, back hem, inner legs, and crotch for tough yet flexible comfort.

## TEFLON DWR®

More than an ordinary DWR (Durable Water Repellent) – the Teflon DWR used on Ski-Doo gear repels water, oil and dirt to keep riders dry and protect against stains.

Sustainability  
meets Performance

SympaTex®

## DISCOVER THE PERFORMANCE OF SYMPATEX MEMBRANE

LIFETIME WARRANTY

100% RECYCLABLE MEMBRANE & RECYCLABLE AND RECYCLED LAMINATES

PTFE-FREE AND PFC-FREE MEMBRANES AND LAMINATES

100% WINDPROOF AND WATERPROOF PROTECTION

DYNAMIC BREATHABILITY

In addition to being windproof and having superior waterproof performance, Sympatex adjusts to your body's temperature by letting more moisture pass through as needed—dynamic breathability—something a porous PTFE membrane cannot do. Sympatex also doesn't clog, or stretch out like PTFE. It's time to move it up a level with Sympatex.

To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2021 Ski-Doo snowmobiles. Look for this symbol on your track. Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.
